30,000 USD

Vyacheslav 'Yura' Useinov (b1962 Fergana, Uzbekistan) works across a range of media and techniques, including photography, painting, sculpture and installation.

Useinov is one of the current crop of artists who are using the medium of textiles to great effect. He continues to explore the possibilities of textile as a rich utilitarian medium, conceptually as well as in terms of process. His textile works are charged with colour and dynamic energy. His versatility allows him to work in different textile techniques such as tapestry, Chinese chi and quilting, often incorporating traditional embroidery, carpet and architectural ornaments into his textile artworks.

His textile artworks blur the boundary between fine art and craft, representing a hybrid of rich cultural traditions of Central Asia.
